What do we do?

We're innovators, specialists, problem - solvers and design experts with strong manufacturing backgrounds and decades of experience ... working with OEMs on application - specific wood products ... developing some of the most innovative plywood products and unique overlaid panels used today ... producing custom wood products that are guaranteed to perform better and last longer than any comparable product on the market.

Our core competency?

GW creates and develops panel and wood product solutions for specific customer applications - plywood products, laminate panels, marine plywood, portable stages, agriculture panels, plus many other applications - by creating new products and applying existing technologies to new settings.

How do we do it?

Application - specific wood products are difficult to design, and oftentimes, even more difficult to find. This is where GWI excels ... working with you to develop solutions that meet a wide range of criteria and the highest possible

standards for your specific application ... and finding unique, competitive advantages that allow you to differentiate your product from the competition.

GWI truly understands the unique attributes of wood ... based on decades of experience and thousands of problem - solving solutions ... working closely with customers to find the right answers to specific applications ... even developing new products to assure the success of projects and products. In doing so, GWI provides a level of expertise no other company currently offers.

GWI works closely with you on all aspects of the project - cost parameters, availability, bondability for laminating, wear and span requirements, workability, structural requirements, weight, fire retardancy, flatness / trueness, sound and vibration, rot / decay prevention, abrasion, core voids, cosmetic characteristics and interior or exterior applications.

Wood is "green" ... renewable ... environmentally friendly ... and the benefits associated with wood far outweigh any other materials for many applications, especially when properly designed and produced.

GWI supplier relationships assure the highest level of support to our customers. GWI offers the strongest warranties and assurances available.

What's our promise?

GWI products are "guaranteed forever".

Relying on strict quality assurance and production management regimes, GWI takes enormous pride in the consistency and high-quality of the products we supply. While most of the industry uses "close" as an acceptable standard, GWI knows "close" is not good enough for industrial / OEM settings. Uncommonly exacting tolerances, clarity, flatness and grades are the only standard GWI adheres to.

Highest quality standards ... on time, every time.

GWI has set an enviable standard that embraces fresh technologies with exceptionally tight tolerances combined with decades of experience resulting in total customer satisfaction, reduced cost of ownership, near-zero failure rates and a long list of loyal customers.

GWI experience, relationships and resources makes them uncommonly nimble and responsive. This allows GWI customers to meet the market and respond quickly.

Imagine the possibilities!

Put us to work with your idea or your challenge!

- Industrial Grade Fir Plywood.
- Mixed Hardwood Fir Plywood.
- Preservative Treated Industrial Plywood.
- Fire Treated Industrial Plywood.
- Dual Treated Fire and Preservative Plywood.
- Environmental Friendly Treated Plywood.
- Oversize Plywood.
- Poly Overlaid Plywood and Composites.
- Cheese Boxes.
- Big Bins.
- Countertop Panels.
- Cabinet Components.
- Imported Panels.
- Agricultural Panels.
- Cooling Tower Panels.
- Mill Direct Importers of Tropical Hardwood Kiln Sticks.
- FSC certified wood products.
- Mezzanine flooring, decking and panels.
- Marine panels.
- Animal confinement applications.
- Horse stalls and shelters.
- Honeycomb panels.
- Viking Ice / synthetic "ice" for rinks.
- Transportation applications (Utility vehicles, container floors, truck bodies, etc.).
- FRP (Fiberglass Reinforced Panels).
- Truck / trailer panels.
- Bus panels.
- Light rail.
- Vehicle sound dampening structural panels.
- Acoustical panels.
- Frame-grade furniture plywood and components.
- Recreational & institutional surfaces (stage floors, billiard tables, banquet tables, etc.).
- Sandwich panels.
- Industrial lumber (Barricade parts, ladder parts, pine cut stock).
- Industrial LVL (Laminated Veneer Lumber).
- Plywood fabrication (cut-to-size, laminated, painted, plywood drilling / shaping).
- Portable stages and dance floors.
- Bleachers.
- Door panels (overhead and swing doors).
- Door and window parts.
- Anyplace, anywhere panels or wood products are used!

Strategically positioned distribution centers provides immediate access to clean, weather protected inventory.

Tired of the waste, costs, inconsistencies and poor quality of wood material used in home construction?

GW I puts the "right engineered" wood and plastic panel products into the hands of quality - focused manufacturers every time while delivering the best possible combination of service, pricing and guaranteed future supply.

Simply put, GW I customers save money, reduce labor / fall out, and solve problems with unique characteristics that meet a particular need (sometimes, even developing proprietary solutions). But that's not all!

One of the keys to our success is our close relationships with suppliers. Working with mills, treaters, extruders, laminators, plastic compounders, as well as many other proven technologies allows us to effectively respond to customer needs.

Call today for detailed product and pricing information. We're eager to work in your behalf.
