

Laminated Panels

A Unique Mix of Strength and Durability

Laminated Panels Combine the Best of Both Worlds
Strength, Stability, Low-cost + Durable, Attractive, Versatile

Quality

Overlay permanently bonded with an exterior glue
Structural substrates manufactured in compliance with US Product Standards

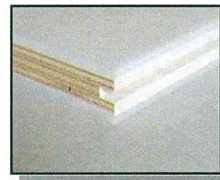

100% Waterproof

Ideal for moist areas
Exterior applications
Bathroom partitions
Animal confinement

Sturdy and Lightweight

Easy to install
Will not chip, crack, or break

Easy to Clean

Reduces maintenance time
Wheel marks and stains easily removed

Resilient Composition

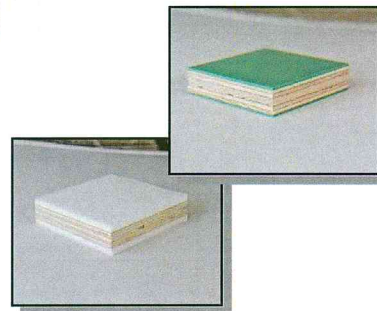

Durable non-slip surface
Resists wear and abrasion

Decorative Patterns and Finishes

Available in a variety of colors
Color-matching available

Popular Substrates

Plywood
Oriented Strand Board (OSB)
Particle Board
All Composites
Urethane
Foam
Medium Density Fiberboard (MDF)
Honeycomb Panels

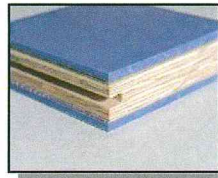

Overlays

High Pressure Laminate
Melamine
Polyesters, PVC
Fiberglass
Polyethylene (UHMW; HDPE)
Paper (MDO, HDO)
Polypropylene
Aluminum, Stainless Steel
Many more

Common Industry Applications

Marine, Boat, and Yacht Manufacturing
Agricultural Equipment
Animal Confinement
Material Handling
Synthetic Ice Rinks
Signage
Stages, Bleachers, Dance Floors

Transportation
Bus, Rail, Light rail, Rail Cars,
Trucks, Trailers, Containers
Class A Recreation Vehicles
Specialty Doors and Windows
Banquet and Industrial Work Tables

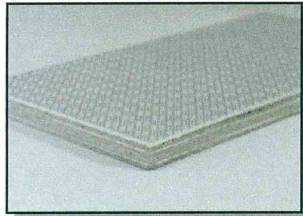

Warranty

Guaranteed against delamination and manufacturing defects for the life of the panel.

Technical Information The Right Overlay for the Right Application

**Customized**

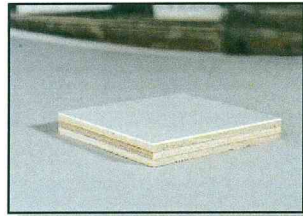

Designed for your application, built to your specs.
Choice of substrate, overlay, color, and dimensions

**Standard Panel Sizes**

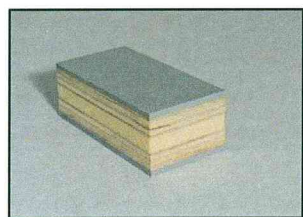

4' x 8' 4' x 9' 4' x 10' and up to 10' x 40'
Kits, Smaller Sizes, and Cut-to-Size on request

Standard Panel Thickness

Any thickness from 1/8" to 3"

**Cut-to-Size**

Computer router cutting and individually labeled kits
available

**Edging**

Two or Four Edges
Tongue and Groove, Square-edge, Ship-Lap
Custom edging available

**Functional, Utility, or
Decorative Faces
(Smooth or Textured)**

On one or two sides
Decorative face can be combined with carpet
or durable Laminate backer

Paint

Color matching in any combination

FDA Approved

High density polyethylene overlay can be
manufactured to meet FDA Code of Federal Regulations

Overlays

Permanently bonded with an exterior glue
Guaranteed for life against delamination

Substrate

Designed for structural applications or "weight savings"
if needed

Chemical Resistant

Polyethylene overlay resists common solvents, oils,
and alkalis

Quality You Can Trust

You can depend on Greenwood Industries' experience for the best in laminated panels. All products are tested to measure physical and mechanical properties including density, hardness, abrasion resistance, impact strength, water absorption, and internal bond strength.
